

## AFRICAN IVORY

Ivory is a 'wake-up call'; we are made aware and are given clarity. The remedy allows us to see beyond what is obvious; to see clearly how things are and not how we are told they are; to see the reality of a situation rather than what we would like to see. It is a remedy of discrimination through its helping us to clear the mind of obfuscating and chaotic mind-chatter and to stand back and allow things to unfold in their own time. Allows people to hear what is said on a much subtler level so that they pick up nuances of unspoken meaning. It is also a remedy to readjust one's compass so that one's original life path comes back into plain view.
